

## 5 OUTSTANDING REASONS for choosing West River Visiting Nurses

- ♥ Care is delivered at home. Staying in the home provides a more restful, healing environment.
- ♥ Home care keeps families together and involves them in the plan of care.
- ♥ You are better able to maintain independence.
- ♥ Home care is safe. Highly trained individuals provide home care services under the direction of the patient's physician.
- ♥ New or recurring problems can be discovered promptly and reported to your physician.

## REASSURING CREDENTIALS

West River Visiting Nurses is licensed by the North and South Dakota State Departments of Health and is certified by Medicare.

Our staff of skilled professionals has been providing safe, dependable healthcare and assistance to patients in southwest North Dakota and northwest South Dakota homes since 2009.

Working with physicians is second nature to us. During the course of providing your home healthcare, our nurses maintain professional

a relationship with physicians through follow-up consultations and close communications on patient care issues. Your physician is consistently informed of your progress. It is the kind of connection that helps serve our patients in the best tradition of medicine and healthcare.

Because the needs of patients differ, we offer a variety of services. Services are provided for patients recuperating from an accident or injury, recovery from surgery, or a recent illness.

Registered nurses assess the patient's condition and assist them in understanding illnesses, medications and treatments.

## QUALIFYING FOR HOME CARE

Once home care is ordered, West River Visiting Nurses does the rest.

We confirm eligibility with the proper payment source.

We then contact the physician to receive instructions about the type of care to be received.

While your physician must order home care for you, other people can start the referral process. Anyone may call a referral to our office. You may schedule an assessment visit at no charge. Your eligibility for home care services will be verified with the proper payment source.

## HOME HEALTH CARE ARRANGEMENTS

1. Tell your physician that you want us to provide home care service.
2. When your physician orders home care services, we will confirm your eligibility with the proper payment source.
3. You will begin receiving home care services from us as soon as a nurse is available.
4. In addition to Medicare, the Veterans Administration and private insurance firms like Blue Cross/Blue Shield will pay expenses associated with home health care. Patients are always welcome to cover the cost directly.
